## **DETAILED ACTION**

### ***Priority***

Page 1 must include a reference to the parent application as well as the particular relationship between it and the present application (continuation, continuation-in-part, division).

### ***Specification***

1. The disclosure is objected to because of the following informalities: (1) "15" (page 4, line 23) should be – 16 --; (2) "21" (page 8, line 7) should be – 16 --; (3) "21" (page 10, line 29) should be – 21A --; and (4) "2" (page 11, lines 7 and 13) should be – 6 --.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

2. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. "Rotating shaft" (claim 3, line 2) lacks antecedent. Applicant should review the claims for any additional informalities.

### ***Comment Re Claim 1***

"To" should probably be inserted after "positioned" (claim 1, line 9).

### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

**A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).**

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-4 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 21-23 of copending Application No. 09/984,766. Although the conflicting claims are not identical, they are not patentably distinct from each other because each of claims 21-23 recite the structure that enables the adhesive roll to move relative to the frame to maintain the recited "constant distance" and that any differences, for example, between claim 1 and claim 21 would be obvious to one of ordinary skill.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

### ***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by JP-2-12363. '363 discloses a cleaning device (21) comprising a frame (23), "scraping up body" (either 5a or 5b), adhesive roll (15), rotating body (the other of 5a or 5b) and wherein the adhesive roll is disposed in contact with both the rotating body and the

scraping up body (claim 2) wherein the adhesive roll includes a rotating shaft (8) provided to engage a track (24) (claim 3) within the frame such that the adhesive roll would engage the rotating body and the scraping up body no matter the diameter thereof.

***Claim Rejections - 35 USC § 103***

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over JP 2-12363 in view of JP 63-163767. '363 discloses the invention substantially as claimed with the exception of the biasing means. '767 discloses an adhesive roller (2) similar in function to the one of '363 (it also includes a shaft (5) riding in a track (8) in the frame) and further including a biasing means (9). It would have been obvious to one of ordinary skill to have provided such a biasing means to '363 to provide for between engagement between the adhesive roll and the rotating and scraping up bodies.
